

Who has left some footprints?

[illegible]

Dear Year 2,

I hope you don't mind me hopping into your classroom but I was feeling a little lonely over time at the school. I have been feeling off our trees. The forest has all been cut down and the animals have disappeared and I wonder if you know anything about this.

I am a large bird and live in the beautiful tall trees near your school. If you are observing me, may have seen me on the ground around your wonderful school grounds. I have magnificent, powerful wings that we think and where I fly, I am a powerful bird. I'm not very shy.

Please will you find out where I am and the birds go? I would love to find out who they went away. I don't find out until it is too late. Please write back.

Thank you so much
Best wishes

Dear Year 2,

I hope you don't mind me hopping into your classroom but I was feeling a little lonely. Ever since all the leaves started falling off our trees I've noticed lots of my other bird friends have disappeared and I wondered if you knew why?

I am a large bird and I live in the beautiful tall trees near your school. If you are observant you may have seen me as I fly gracefully around your wonderful school grounds. I have magnificent, powerful wings that are black and white. People call me mischievous but I'm not sure why.

Please will you find out where did all the birds go? I would love to find out why they went away if you find out will you let me know please. I hope it's not because of me being mischievous! Please write back.

Thank you so much
Best wishes
